

SAINT ALPHONSUS HEALTH SYSTEM

Opioid Education

In order to provide the safest care for our patients, we must stay up to date on opioid utilization best-practices. Based on the importance of this topic, all medical staff are required to complete 2 hours of opioid/pain management related CME. New providers must attest to this requirement within 6 months of coming on staff (education received within the previous 2 years meets this requirement). We expect all med staff to continue to receive CME in this area with an attestation stating that they have received an average of 2 hours of CME since June 30, 2019.

Education Options:

- **CDC LINKS:**
<https://www.cdc.gov/drugoverdose/training/online-training.html>
Applying CDC's Guideline for Prescribing Opioids
 - You can pick any of the available modules to get your credits
- **ADDITIONAL RESOURCES**
 - Medscape: Opioid Prescribing
 - Saint Alphonsus, November 2021 Grand Rounds
 - Any related approved education offered through your specialty college, medical society, or other organization
 - National Institute on Drug Abuse:
<https://www.drugabuse.gov/nidamed-medical-health-professionals/health-professions-education/cmece-activities>
 - Health.gov: Pathways to Safer Opioid Use
