

COVID-19 Vaccine Administration: Remember the Six Rights

ALERT: The COVID-19 vaccine has multiple presentations and formulations for various age groups. This represents a significant risk for medication administration errors!

Keep the five rights as well as documentation (often known as the sixth right) at the top of mind:

- 1** The **Right** Patient
- 2** The **Right** Medication
- 3** The **Right** Dose
- 4** The **Right** Time
- 5** The **Right** Route
- 6** The **Right** Documentation

- Pause and study the vaccine label. Is it the correct formulation for the patient's age?
- There is danger in bypassing safety steps built into the system.
- When an alert appears on the screen, read it carefully.
